

AMB Consulting Group ~ Wetumpka, Alabama

AMB Consulting Group, LLC is a leading international consultancy group providing a comprehensive portfolio of business and industrial consulting services as well as workforce and outsourcing solutions.

Supplier Capacity Engineer:

AMB Consulting Group, LLC (Wetumpka, AL) seeks a Supplier Capacity Engineer.

Responsible for managing supplier capacities and supplier readiness of purchased part production for vehicle production by proactively steering supplier industrialization in the project phase and evaluating associated risks. Lead crisis management and manage shortages related to capacity bottlenecks. Safeguard production volume of parts; analyze production capacities; identify countermeasures for bottleneck processes; evaluate material flow output efficiency at supply base, including supply chain management; negotiate and track adjustments at suppliers (tool, equipment, headcount) due to production volume fluctuations; identify issues and develop countermeasures and track measures to completion and/or escalation to management; drive decision making process on supplier relevant investments and present to steering committee for decision by aligning with all relevant parties (e.g. Sales, Purchasing, Supplier Quality); create formal status and decision making reports for steering committees (e.g. for critical series supplier topics, new project status and creation of audit reports as well as decision making reports); ensure shipment of correct quality level in the right quantity in the requested time at supplier base, confirm necessity of investment (e.g. correct amount of equipment, manpower, packing and overtime); support crisis management for short-term and long-term shortages at supplier; and organize and lead on-site evaluations of supplier to identify logistics process issues, evaluate supplier logistics capability, track agreed countermeasures with supplier, and organize and conduct follow-up visits to ensure implementation.

Requirements:

Bachelor's degree in Mechanical Engineering, Industrial Engineering or related. 5 years of experience in an engineering role including supply chain management, supplier quality, and automotive manufacturing.
