AMB Consulting Group ~ Wetumpka, Alabama
AMB Consulting Group, LLC is a leading international consultancy group providing a comprehensive portfolio of business and industrial consulting services as well as workforce and outsourcing solutions.

Project Management Specialist:

AMB Consulting, LLC (Wetumpka, Alabama) seeks a Project Management Specialist to understand and communicate the impact of innovations and related logistics processes to the organization for Individualization, Manufaktur and Limited Editions. Coordinate and track needed process changes with impacted Logistics colleagues. Maintain and improve logistics process capability and efficiency to ensure customer satisfaction for both internal and external customers. Support SCS-divisional targets and Continuous Improvement activities throughout operations. Drive the problem tracking and resolution processes with system tools, meetings and escalation platforms. Maintain a consistent and high-level information flow and communication with stakeholders. Drive cross-functional problem-solving efforts to prioritize and eliminate recurrence of top concerns. Track open topics regularly and ensure compliance with SCS standards. Investigate and eliminate causes of systematic logistics process problems and follow up on corrective actions. Coordinate escalation platforms including cross-functional problem-solving efforts to prioritize and eliminate recurrence of top logistics concerns. Support procurement and preparation of required gauges and measurement devices needed to support new innovations and ensure logistical process readiness. Maintain budget for applicable projects, including investment, running cost, manpower, and ePK targets. Track lessons learned for planning and implementation of logistical processes. Conduct manpower planning for the department and launch relevant activities for administrative, direct, and indirect headcounts including project-related travel. Lead the Logistics portion of the GM-Release process (Q-Release Plant) to ensure new launch content is customer-ready with respect to logistics process readiness across Safety, Quality, Delivery, Cost, Morale, and Miscellaneous categories.

Requirements:

Bachelor's degree in Industrial Engineering, Mechanical Engineering or a related field, and 1 year of experience in the automotive industry, including experience in CAD & Design: Siemens NX, CATIA; Data Analysis & Office Tools: Microsoft Excel, Word, PowerPoint, Outlook, Power Automate, Power BI, VBA; ERP Systems: SAP S/4HANA, SAP ERP; and Simulation & Process Modeling: Plant Simulation.
